TX-5410 MFP Z36

TX-5310

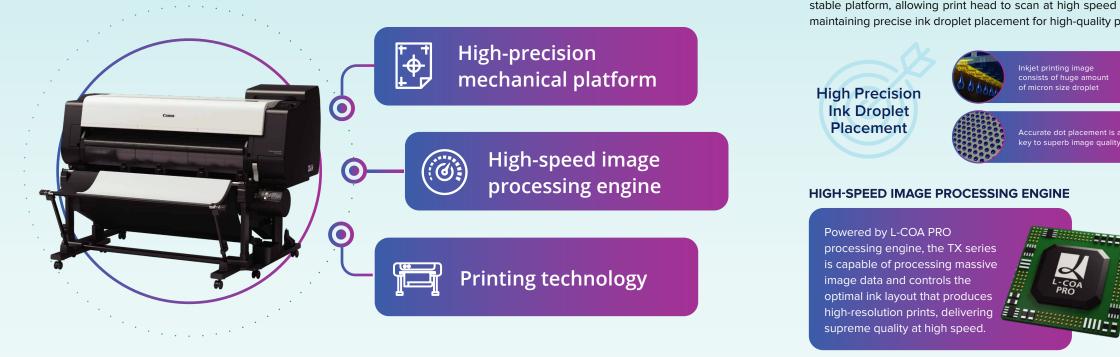

The new Canon imagePROGRAF TX series printers are engineered to deliver outstanding quality, high productivity and operability. Equipped with unique class-leading print technologies and security features, TX series is the ideal solution for all CAD drawings, GIS, perspective rendering and poster printing.

## **CORE TECHNOLOGIES**

### INCREASE YOUR PRODUCTIVITY AND WORKFLOW EFFICIENCY

The TX series realised faster throughput during continuous printing by optimising the pre-processing of print data, process of media cutting and media transport.

Pre-print operation and print spooling have been optimised to achieve faster first print from standby or sleep mode.

#### Automatic Media Loading

Simply load a roll of media on the arm. The printer detects the roll and automatically feeds the media. No manual roll feeding is required. This greatly reduces time taken for media loading and avoid staining or scratching the media surface.

#### **Automatic Media Type Detection**

Automatically detects the media type and width with the internal database and historical media usage data in the printer. Optimum setting and adjustment to print ready status with minimal supervision.

#### **Automatic Remaining Media Estimation** Automatically estimates the remaining roll amount and gives alert when media is insufficient for the print jobs. This eliminates the need of barcode printing

while saving time, paper and ink.

second roll of a different or same media type and size to minimise the downtime during high-volume continuous printing. The unit can be configured as a bi-directional media take-up unit to rewind longer prints for further processing such as lamination.

The TX series offers efficiency needed by high-volume printing. The optional stacker is capable of stacking up to 100 sheets without the need for operator handling.

#### HIGH-PRECISION MECHANICAL PLATFORM

The unibody structure is engineered to provide strong and stable platform, allowing print head to scan at high speed while maintaining precise ink droplet placement for high-quality print.

#### **PRINTING TECHNOLOGY**

The TX series employs FINE print head, PF-06, which is 2.7178 cm (1.07 inch) wide with 6-colour channels and 15 360 nozzles. The improved thermal diffusion provides better uniformity of ink density and colours, while non-firing nozzles detection will automatically compensate for nozzle blockage, ensuring best quality on every print.

The LUCIA TD 5-colour all pigment ink is developed to produce high-quality printing for a wide range of applications such as drawings and posters on plain paper, posters and graphics on coated paper and glossy paper, and printing on water-resistant poster paper.

Simultaneous use of black and matte black inks produce text and lines that are dense and crisp with minimal feathering.

The LUCIA TD ink system gives vibrant colours in poster printing. It has excellent colour fastness to minimise colour fading and exhibits superior outdoor weather resistance with water resistant media.

Borderless printing on standard and custom sizes is now possible for all supported media. The printer is also capable of three-sided edge-to-edge printing on various sizes that do not match the roll paper width. This allows more flexibility in borderless printing task compared to the traditional standard four-sided borderless print.

Constantly reserving ink in sub ink tanks allows users to replace ink tanks without having to stop printing. This eliminates downtime in continuous printing and enables ink inside the ink tanks to be fully utilised.

### SECURE YOUR PRINT ENVIRONMENT

The TX series complies with Advanced Encryption the Standard (256-bit) established by the US National Institute of Standards and Technology (NIST).

### SECURE PRINTING

Keep confidential information secure by protecting the print job with passcode and delay print release until user enters passcode at the operation panel.

#### **SECURE PROTOCOLS**

Data is transmitted securely through secured protocols such as IPSec, SNMPv3, SSL/TLS and 802.1x authentication.

#### HARD DISK DRIVE ENCRYPTION

Print jobs and data are in safe hands with the TX series, they are protected at all times by secured encryption.

#### **FULL ADMINISTRATOR CONTROL**

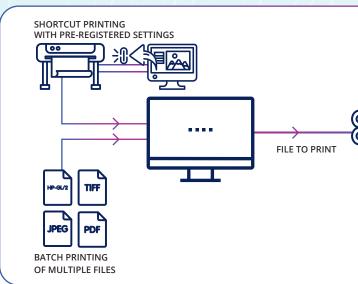

Administrator control makes it possible to restrict operation panel access and printer functionality according to users' level of security requirements.

## MANAGING YOUR PRINT JOBS HAS NEVER BEEN EASIER

Canon software applications are designed specifically to keep each print job on track and improve your workflow and productivity.

### **CPP DRIVER SELECT & PUBLISHER SELECT**

The new TX series enables a smoother workflow integration and management for existing Canon Production Printing (CPP) users with support of CPP Driver Select and Publisher Select.

#### **FREE LAYOUT PLUS**

Free Layout Plus, a print utility that allows users to tile, nest and create custom layouts before printing.

#### ACCOUNTING MANAGER

Accounting Manager is ideal for businesses looking to track printing costs based on the cost of media and ink.

#### **DEVICE MANAGEMENT CONSOLE**

Device Management Console effectively manages multiple printers, monitoring activities such as error messages and printer information, like ink status and status of calibrations.

#### **DIRECT PRINT PLUS**

The newly developed print job submission tool makes workflow simpler and more efficient with features including shortcut printing, batch printing of multiple files, nesting and print job progress monitoring.

### POSTERARTIST LITE

Canon's PosterArtist Lite software lets you design and print professional looking posters with over 1300 templates, photos and clipart to suit a wide variety of business environments. Creating head-turning posters or signs has never been easier.

#### **CANON PRINT INKJET/SELPHY**

The Canon PRINT Inkjet/SELPHY app connects your mobile device wirelessly to TX series to print, scan and copy. It also works as a portal to manage your printer settings and monitor your printer status for a seamless printing experience.

#### MEDIA CONFIGURATION TOOL

Simplifies media management for Canon and third party media, allowing you to customize media in both the driver and printer for optimum print result.

#### imageRUNNER ADVANCE DIRECT ENLARGEMENT COPY

Scan-to-Print using an imageRUNNER to scan images and print directly to TX series printers.

### imagePROGRAF MFP SOLUTION

The new TX series MFP solution provides maximum performance in scanning and copying with speed and precision while keeping its footprint minimal.

Scanner is manufactured by UK based Global Scanning UK Ltd.

#### ALL NEW COMPACT DESIGN

better integrate with the new TX series printers. Lightweight and compact, this small footprint scanner is perfect for any office environment.

#### SINGLE SENSOR, DUAL LED TECHNOLOGY

The new Z36 scanner is designed from the ground up to Single sensor covers full width ensures the finest text is reproduced without misalignment. Bi-directional illumination from dual LED reduces shadowing at creases or folds, ensuring high quality scanned image.

#### PARALLEL PROCESSING OF SCANNING AND PRINTING

Parallel processing significantly improves productivity and efficiency by performing print and scan operation simultaneously.

#### **DIVERSE MEDIA SUPPORT**

Front entry - rewind to front path makes it convenient for regular scanning of plain paper document, while the straight-through paper path accepts scan documents up to 1 mm in thickness.

#### **NEW SYSTEM CONTROLLER**

The large 39.624 cm (15.6in) touchscreen panel system controller makes it easy to perform printing settings and preview before printing. Printer information such as media and ink status can be easily accessed via the system controller. Its embedded OS adds a layer of reliability and stability to the performance of the system controller.

#### **SMARTWORKS MFP V6** WITH ABUNDANT FEATURES

The new SmartWorks MFP scanning software simplifies large format scanning and copying with intuitive user interface and abundant of image enhancement features such as de-skew, white point, colour reversal of diazo print and restoration of deteriorated original images, which is useful for archiving old drawings.

\*11 Scanner is manufactured by UK based Global Scanning UK Ltd. Scanner is supplied with TX-5310 MFP Z36 and TX-5410 MFP Z36.

\*12 The scan rate is proportional across the full range of resolutions supported by the scanner. Actual scan times and quoted top speeds will depend on the host performance and are not guaranteed for all media types. Scan times quoted are the maximum for true 200 x 200 dpi image capture.

\*13 Thicker documents must be flexible and the document return guides removed and may require additional support. Some media should be scanned at reduced speeds. It is not possible to guarantee to be able to scan all media types and sizes. \*14 To return document to the front, use document return guides.

## 15 Document return guides and paper tray folded. \*16 Power consumption is measured with scan resolution setting of 200 dpi.
